Year 11 Course Pre-requisites for 2015

Note: Teachers are aware from past student performance that, for a student to be successful in many of the courses listed below they must achieve a minimum standard (or prerequisite) before they begin the course.

As a result, Woodvale has a policy stating: Students must achieve the prerequisite for a course in order to be considered for automatic enrolment. If students do not meet the prerequisites by the end of Semester 1, then they will have a chance to ask their teachers to review their overall performance in order to determine if their results (which determine if they have achieved prerequisites) are a true reflection of their abilities. If their class teacher believes the student is more capable than the results indicate, then the teacher will be allowed to recommend the student for certain courses.

Unless students have either met the pre-requisites or have a teacher recommendation for a course, they will not be able to select the course for next year. Each student will, however, be given the opportunity to resubmit selections if they achieve perquisites by the end of Semester 2. Of course, classes would already be formed at this stage and there would have to be vacancies for enrolment to occur.

The college will attempt to place all students in courses where pre-requisites have been met; however, enrolment in some of the courses is highly competitive. Not all students who meet the pre-requisites are able to enroll.
